

GarageWeb

A garage website with
MOT booking features

Driving Business Performance

Introduction

Available for garages and workshops, GarageWeb provides a turnkey solution that enables businesses to develop an effective online presence.

Origin GarageWeb is a brochure website package designed specifically for the garage sector. GarageWeb is available in a range of mobile-compatible designs, and allows colour customisation to match your brand. Optional integration with the Autowork Online garage management package allows customers to check MOT workshop availability, and book their MOT appointment online.

: Included

: Optional

Flexible design options

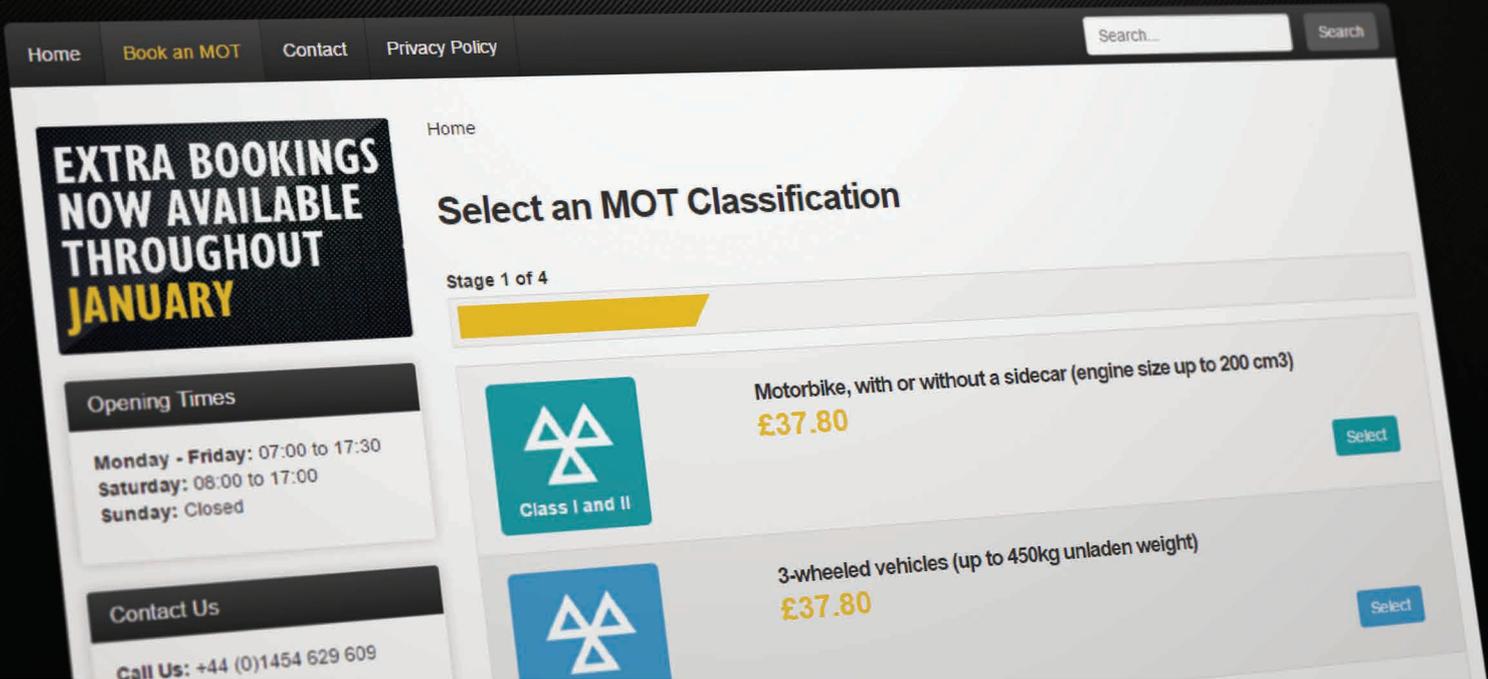

GarageWeb provides a high degree of flexibility that allows the site to be tailored to match your own brand identity. The package offers a selection of different layout templates that can be customised to suit your preferred colour scheme. You can modify the layout further by adding your company logo, including a background image, and displaying your own banner adverts.

If you require additional flexibility or a design that cannot be achieved via the templates, please contact us to discuss a fully bespoke solution.

Feature	
User-friendly CMS admin area	✓
Static page editor	✓
File manager	✓
Mobile-friendly website	✓
Integrated online MOT booking feature	✓
VRM Lookup feature	✓

✓ : Included

⊕ : Optional

User-friendly CMS admin area

GarageWeb features a comprehensive admin management dashboard, allowing you to easily manage your website's live pages. It's also possible to create and manage multiple navigation menus, including dropdown sub-menus.

Easy to use static page editor

With this page editing feature, you can upload text and images to create pages on your website. This could be a page to promote a new service your business is offering, or something as simple as your site's opening times.

File manager

Working in conjunction with the static page editor, the file manager option allows you to upload files to your website. These files could be text, images, or promotional banners to feature on your webpages. All the files you upload will be saved onto your server, so they will be readily available should you need to use them again.

Mobile-friendly website

Your GarageWeb site will be fully compatible with mobile devices such as smartphones and tablets, and is also fully responsive to the viewer's screen resolution.

✔ Online Booking

Online Booking is a new module designed to be integrated into garage websites, allowing motorists to book MOTs online. MOT classes, pricing and available times are controlled through Autowork Online and updated in real time on the website.

Online bookings automatically update in the Autowork Online MOT diary, creating job cards with all the relevant details. Changes to availability made in Autowork Online are reflected on the website, allowing garages to manage all of their MOT appointments in one place, with no re-keying or scheduling conflicts.

✔ VRM Lookup feature

Integrated with the Online Booking feature, the VRM Lookup facility allows a customer to enter their vehicle's registration number, with the system automatically retrieving the information on their vehicle, such as Make and Model. Manual entry is also possible for cases such as imported vehicles.
